*With this covering note

Memorandum for: The DDI

SUBJECT: OBGI and I, After One Year

It has not been a year of miracles. But in some areas there is motion where a year ago there was none. Most OBGiers feel that greater demands are being made of them. They are correct. Some see challenge in the new regimen. Those I prize.

I have pushed Editorial and Geography Divisions especially hard. Editorial has responded well considering the shortage of top talent there and considering the vigor of my attack on so many NIS icons. Geography has come along too, but haltingly.

Cartography's problems are less acute, and I can safely concentrate primarily on the other Divisions a bit longer. The leadership, morale, and location problems of Map Library Division are well known to you, and I'll not dwell on them.

The NIS story is the subject of another memo, which you have seen. Beyond that my main concerns are how to get a greater share of Geography Division's energy flowing into the main current, how to keep map procurement extant, and how to make kithship blossom in the conglomerate.

I am not discouraged.

Director, OBG.I

PS - Attached is a review the highlights of the year....
